

ALEKSANDAR POPOV

IT Support Specialist

Profile

CompTIA Network+ Certified technical professional with a simple value proposition: I work on your clock. Based in a strategic global time zone (GMT+7), I offer complete schedule flexibility to align with your operations. Whether you need a dedicated technician for US/UK/ANZ Business Hours or reliable coverage for Graveyard Shifts/Weekends, I'm the missing puzzle in your organization. With a background in **Windows Server/AD deployment** and a native-level English proficiency, I bridge the gap between complex technical issues and non-technical end-users. Available immediately as an Independent Contractor (B2B) or through EOR.

Relevant Technical Experience

Lingo Leap (EdTech Startup) | 2023 - present | VIETNAM

IT Administrator/Head Teacher

- **Infrastructure Management:** Managed the end-to-end technical stack for a boutique online school, including website design and coding, deployment, maintenance, hosting configuration, and DNS management.
- **User Support:** Provided white-glove technical support for remote teachers and students, resolving webcam, microphone, and connectivity latency issues via remote desktop tools.
- **LMS Administration:** Administered the Learning Management System (LMS), managing Identity and Access Management (IAM) for 10+ staff and 100+ students (User Provisioning, Password Resets, RBAC).
- **Security Implementation:** Hardened the SOHO network and implemented data privacy practices (PII protection) for student records, ensuring basic compliance with privacy standards.
- **Instruction & Compliance:** Designed and delivered English curriculum to 100+ students, conducted interviews and teacher training, ensuring compliance and adherence to teaching requirements and standards.

Win Win Computers | (2016 -2019) | SERBIA

IT Support and Hardware Technician

- **Hardware Diagnostics:** Performed bench testing and troubleshooting on desktop/laptop hardware, diagnosing motherboard, PSU, and RAM failures for 50+ walk-in clients weekly.
- **OS Deployment:** Executed clean installations and data migrations for Windows 7/10 operating systems, ensuring driver compatibility and data integrity.
- **On-Site Field Support:** Deployed to client homes to configure SOHO routers, troubleshoot ISP connectivity issues, and perform malware remediation (virus/spyware removal).
